***DETAILED ACTION***

1. This communication is in response to applicant's communications filed 11/12/2004 in the application of Roberson et al. for a "Method and apparatus for transporting network management information in a telecommunications network". Responsive to the restriction requirement, affirmation of the election has been made by applicant, and a provisional election was made without traverse to prosecute the invention of group I - Claims 1-16 and 30-31. Claims 17-29 are withdrawn from further consideration by the Examiner, 37 C.F.R. ' 1.142(b), as being drawn to a non-elected invention. Newly set of claims 32-55 have been added. Claims 1-16, 30-55 are pending in the application.

***Election/Restriction***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-16 and 30-31 drawn to the Multiple levels of multiplexing to form a multiplex hierarchy: Subject matter having more than one multiplexing stage, including details of methods or apparatus for formatting, converting, combining, or distributing information signals for transmission or reception via more than one time or frequency channel, and wherein all input channels have same amount of information transmitted per unit time, classified in **class 370, subclass 541**.
- II. Claims 32-55 drawn to the time division multiplexing (TDM). Subject matter in which a station is assigned a vacant time slot channel in a time multiplex frame in

response to that station's request for access and the assignment lasting until it is withdrawn, classified in **class 370, subclass 321**.

3. The inventions are distinct, each from the other because of the following reasons:  
Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the use of TDM frames, which does not include the particular listed of the invention I, such as the Multiple levels of multiplexing to form a multiplex hierarchy in SONET frame network. See MPEP ' 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37.CFR 1.143). In advance prosecution of the invention, affirmation of the election need to be made by applicant (Elect Group I or Group II).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Man U. Phan whose telephone number is (571) 272-3149. The examiner can normally be reached Monday through Friday from 6:00 am to 3:00 pm.

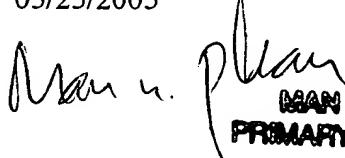

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu, can be reached on (571) 272-3155. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.

8. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
